O&O Syspectr: Free IT Cloud Management for Windows

Berlin, February 15, 2018

This improved O&O Syspectr now monitors PCs and Server free of charge and notifies users of any potential risks before they turn into big problems; are all Windows security precautions in place on all PCs and servers, have all security-relevant Windows updates been installed, or was any new software detected that really shouldn't be there?

To better meet all current demands for security, O&O Software GmbH has now decided to offer its IT management solution, O&O Syspectr, free of charge and without any restrictions.

O&O Syspectr's management interface is run over a browser and can be used on any device with an internet connection. This makes it possible to monitor and manage Windows machines anytime and anywhere.

O&O Syspectr is free for all operating systems and can be used on an unlimited number of endpoints. All data is kept in German data centers, is subject to German laws regarding privacy, and will never be shared with any third parties. Please note that German laws regarding privacy are among the strictest in the world and violations are severely punished.

Installation and setup in less than five minutes

Using O&O Syspectr is extremely easy: after setting up an account at https://www.syspectr.com/ it's possible to monitor any number of PCs and servers. All that's required is the one-time installation of the Client app on the computer. Once that's done, all settings can be configured and events monitored via the web interface.

Along with a view of software and hardware inventories there's an integrated Remote Desktop that is run over a browser. The Remote Desktop can be used without additional installation on all current Smartphones and Tablets. The same applies, of course, to all desktop PCs.

O&O Syspectr also detects errors and problems if a machine is turned off or is no longer able to start. This allows it to access and analyze all system information. O&O Syspectr can be set to immediately notify users of any important events so that a quick response is possible.

The user can have all relevant system information displayed at any time: hardware, software, fill levels, and health status of hard disks, IP addresses – internal and external - and much, much more.

Made in Germany. Made in Berlin.

O&O Syspectr is, like all O&O products, developed entirely by O&O Software in Berlin and is made

accessible via German data centers; free, without functional restrictions or limits to the number of computers.

Module

The functionality and list of modules is being constantly extended. The following modules are currently available:

- Monitoring of Windows security settings and installed anti-virus solutions.
- Verification that all Windows updates are installed
- Display of programs installed on the computer.
- Connected harddisks and their used space are listed.
- USB devices can be monitored and blocked.
- Harddisk information is evaluated and warnings are issued for impending malfunctions such as exceeding critical operating temperatures or frequent read/write errors.
- Monitoring the status of processes and services, white and black lists are possible.
- Remote Desktop is displayed in a browser.
- Remote Console opens a command on a remote computer.
- Powershell scripts enable planned remote commands to be executed.

System Requirements

OO&O Syspectr is compatible with Windows Editions 7, 8, and 10 as well as Windows 2008/2008 R2, 2012/2012 R2 and 2016 Server. It can be used on physical as well as virtual machines. O&O Syspectr requires an internet connection. Additional hardware or configuration of anything like a DSL or internet router is not needed.

Pricing

O&O Syspectr can be used at no cost on an unlimited number of desktop and servers.

About O&O Software

O&O develops solutions for corporate customers that not only support them in their daily activ-ities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 140 countries, all from our headquarters in Berlin, Germany.
