

# Manage Avira for Business easily and from anywhere with O&O Syspectr

**The enterprise solutions from Avira Antivirus can now be managed and monitored directly in O&O Syspectr – the Windows Management solution in the cloud. Thanks to O&O Syspectr, IT administrators and service providers are given an overview of their entire Windows infrastructure, unlimited and accessible from anywhere. Whether it's over a smartphone, tablet, notebook or desktop – O&O Syspectr can be accessed from a browser on any device. Avira-integration provides a simple, direct activation and rollout of Avira licenses in just a few minutes. The following endpoint products are components of O&O Syspectr's multi-client capabilities: Avira Pro for Business, Avira Antivirus for Endpoint, Avira Antivirus Server as well as Antivirus for Small Business.**

Tett nang and Berlin, Dezember 4, 2018

The user-friendly app makes it possible to monitor all events on Windows systems in real-time. The IT admin can be notified of any important events requiring immediate attention by email, free of charge.

Small and medium-sized businesses in particular can avoid substantial costs by using O&O Syspectr: management requires no additional infrastructure, software, or expertise – just an internet connection. Setup can be completed in less than 5 minutes. Register. Download. Install. That's it. The admin or service provider can have relevant system information displayed anytime and anywhere: hardware, software, fill levels and health status of hard disks, internal and external IP addresses, and much more.

Along with software and hardware inventories there's an integrated Remote Desktop that runs in a browser and can be used without additional installation on all current smartphones and tablets, and of course on all desktop PCs.

O&O Syspectr also supports detecting errors and problems when the machine is turned off or is no longer able to start. This enables it to gather and analyze all system information.

Further information can be found on <https://www.syspectr.com/en/avira-antivirus>

## **Privacy. Made in Germany. Made in Berlin.**

O&O Syspectr, as is the case with all O&O products, is developed entirely by O&O Software. The cloud app is developed in Berlin and runs over a German cloud infrastructure. This means O&O Syspectr is subject to European and German laws regulating privacy (DSGVO, BDSG). Increased security requirements are provided by two-factor authentication as stipulated by RFC 6238.

## **System Requirements**

O&O Syspectr is compatible with all current Windows versions for desktop and server systems, and can be used on both physical as well as virtual machines. O&O Syspectr requires an internet connection but there's no need for any additional hardware, DSL configuration, or internet router. Once an account is setup on <https://www.syspectr.com> it's possible to monitor an unlimited

number of PCs and servers. The only other thing needed to start is a one-time installation of the app on the client computer. The web interface can then be used for configuring all settings and monitoring events.

### **About O&O Software**

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 140 countries, all from our headquarters in Berlin, Germany.

### **About Avira**

Avira protects people across the networked world  and gives everyone the option of managing, protecting, and optimizing their digital life. Avira's enterprise portfolio provides security solutions for Windows, Android, Mac and iOS. We supplement our protection technologies through OEM Partnerships in which Avira is integrated as an added-value. Our security solutions remain, time and again, at the top of the list when it comes to detection, performance, and user-friendliness. Avira is a family-owned business with 500 employees. Our headquarters is located in Tett nang on Lake Constance with additional branches in Romania, India, Singapore, China, Japan, and the USA. A portion of Avira's earnings are donated to the Auerbach Stiftung, which supports efforts for furthering education as well as helping needy children and families. Additional information about Avira can be found under [www.avira.com/en/for-business](http://www.avira.com/en/for-business)
